SOFTWARE ENGINEER · AI, AUTOMATION & SYSTEMS INTEGRATION

Majd Mimoun

Full-stack software engineer with **5+ years** building production systems for **online marketplaces** and **AI products**. I design event-driven back-ends on AWS, integrate services through **APIs and third-party platforms**, and ship web applications end to end — from technical design to production.

Current role	**Full Stack Engineer – AWS Groupe La Centrale**
Experience	**5+ years**
Based in	**Paris, France**
Education	**Computer Engineering, ESPRIT**
Languages	**Arabic · French · English**

01 · CORE EXPERTISE

What I bring to a team

Hands-on experience across the full chain: systems, AI and automation, web platforms, and the integrations that connect them.

Systems programming & development

- Microservices and serverless back-ends in Node.js & TypeScript
- Technical design, task definition and production delivery
- Unit, integration and end-to-end testing; refactoring for performance

AI & automation

- Built features for an AI dialog manager powering chatbots & callbots
- Interactive voice server that routes customer calls automatically
- Workflow automation with AWS Step Functions & event pipelines
- Training: Developing Generative AI Applications on AWS

Web platforms

- Web apps, SaaS platforms and admin dashboards with React & Next.js
- White-label SaaS for online education (Alminhej, side project)

Marketplaces & customer engagement

- Buyer/seller lead generation for La Centrale, Caradisiac & Promoneuve
- Customer engagement integration with Braze

APIs & integrations

- REST APIs with Node.js & Express
- Event-driven integration with EventBridge & Kinesis; webhooks
- Third-party integration with Braze; real-time with Socket.IO and Agora

Cloud & DevOps

- AWS Lambda, Kinesis, EventBridge, Step Functions, DynamoDB
- Infrastructure as code with AWS CDK
- CI/CD (Azure DevOps, Jenkins), Docker, Kubernetes monitoring

02 · PROFESSIONAL EXPERIENCE

Where I've delivered

12/2021 — Present

Paris, France

Current

Groupe La Centrale

Full Stack Engineer – AWS

Automotive marketplace group operating La Centrale, Promoneuve and Caradisiac. I work on the platform that generates and delivers buyer/seller leads.

- Build and evolve an event-driven lead generation platform on a serverless AWS microservices architecture.
- Lead new features end to end: technical design, ticket definition, development, testing and production deployment.
- Integrate the platform with Braze for customer engagement.
- Provision cloud resources as code with AWS CDK.
- Write unit and integration tests; contribute to architecture reviews and lead refactoring for code quality and performance.

Node.js · TypeScript · React · Lambda · Kinesis · EventBridge · Step Functions · DynamoDB · CDK · Braze

---

01/2021 — 12/2021

Paris region, France

Zaion

Full Stack Engineer

AI company building chatbot and callbot solutions.

- Developed new features and improvements for an AI-based dialog manager used in chatbot and callbot solutions.
- Collaborated with the DevOps team on the migration to AWS: infrastructure preparation and CI/CD pipelines.
- Delivered scalable, maintainable code in an agile team.

Node.js · Conversational AI · AWS · CI/CD

10/2020 — 01/2021

Tunisia · French client

IYA SOFT

Software Engineer

- Led front-end development for FrenchInnov products.
- Built pull-request-based CI/CD pipelines with Azure DevOps.
- Implemented end-to-end tests with Cypress.

React · Azure DevOps · Cypress

02/2020 — 08/2020

Paris, France

ZACK

Full Stack JavaScript Developer · End-of-studies project

- Built an interactive voice server that processes incoming customer calls and routes them automatically based on the caller's request.
- Developed REST APIs with Node.js & Express and modelled data in MongoDB and PostgreSQL.
- Built the front-end with React and Next.js; containerised with Docker.

Node.js · Express · Next.js · MongoDB · PostgreSQL · Docker

Earlier internships · Tunisia

Pocteo (2019) — Node.js / DevOps / Blockchain: availability monitoring with Prometheus on Kubernetes, GitHub webhooks and Jenkins pipelines, Solidity smart contracts for SLA management.

Sofia Technologies (2017) — Real-time IoT dashboard for smart agriculture: Node.js, Socket.IO, MongoDB, Angular.

Best Web Mobile (2016–2017) — Admin dashboard for school events (React) and an Android e-book application.

03 · PROJECTS

Products I design and build

Personal side projects, maintained as real codebases.

Alminhej

SaaS

White-label platform for online education

White-label SaaS: each organization gets its own branded online education platform.

Next.js · NestJS · PostgreSQL

Al-Rafik · Rufaqaa

Platform

Peer-to-peer Quran memorization

Platform where learners memorize the Quran in pairs, with real-time communication built on Agora.

Next.js · Supabase · Agora RTC

04 · TECHNICAL SKILLS

Toolbox

LANGUAGES	BACK-END	FRONT-END	CLOUD (AWS)
JavaScript, TypeScript, SQL	Node.js, NestJS, Express, REST APIs	React, Next.js, Angular	Lambda, Kinesis, EventBridge, Step Functions, DynamoDB, CDK
DATA	**DEVOPS**	**INTEGRATIONS**	**AI & QUALITY**
PostgreSQL, MongoDB, DynamoDB, Supabase	Docker, CI/CD, Azure DevOps, Jenkins, Kubernetes, Prometheus	Webhooks, Braze, Agora RTC, Socket.IO	Conversational AI, GenAI on AWS (training) · Unit, integration & Cypress E2E tests

05 · EDUCATION & TRAINING

Background

2017 — 2020

Engineering Degree, Computer Engineering

ESPRIT — Private Engineering & Technology School, Tunisia

2013 — 2017

Bachelor's Degree in Computer Science

Higher Institute of Computer Science (ISI), Tunisia

Training

AWS courses

Developing Generative AI Applications on AWS · Advanced AWS Well-Architected Best Practices · Preparing AWS Certified Developer – Associate

06 · CONTACT

Let's talk

Open to new opportunities. Arabic, French and English.
